

Mitry Kozak, the head of the Ministry for Regional Development of Russia announced that the cost of the 2014 Winter Olympics will be considerably less than it was declared. During a brief visit to Beijing he reportedly said that the sports equipment and infrastructural expenses would cost far less than was specified in their bid for the Olympics. The primary measure of effectiveness was the progress in exercise capacity a chance to conduct physical exercise measured from the distance the patients could walk in six minutes after weeks of treatment
